EADS Cassidian, Paris **April 2011 – September 2011**

IT Trainee

Cassidian is the defense and security subsidiary of the EADS group with 28,000 employees worldwide and revenue of €5.4 billion. It is the second largest division of EADS and a major provider of global security solutions, lead system integration and aerial, land, naval and joint systems.

- Identified the specifications required for the project
- Researched existing deployment application and supervision tools
- Integrated a light deployment/supervision tool without making software vulnerable to attack
- Created an overview document on the existing deploying application and supervision tools
- Conceived, developed and integrated a solution in the software
- Developed know-how transmission of the solution

SUNY New York, New Paltz, NY **May 2010 – September 2010**

IT Trainee

- Adapted an existing distributed computing framework written in Java for the LAN environment, making it compatible with Android phones
- Created an Android phone application to monitor a diabetic patient and deliver readings to a web portal; the framework is now used by the researcher's students
- The diabetic application can now be used by patients
- Developed know-how transmission of the solutions
